Alexandria, VA 22313-1450

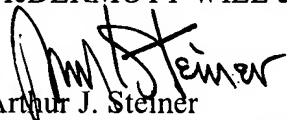

Sir:

Attached is a copy of the Filing Receipt received from the U.S. Patent and Trademark Office in the above-referenced application. It is noted that the domestic priority data is incorrect. Attached is a copy of the first page of the specification, which evidences the correct domestic priority information.

The domestic priority information should read: 60/444,115, 01/31/2003. It is requested that a corrected filing receipt be issued.

Respectfully submitted,

McDERMOTT WILL & EMERY LLP

Date Mailed: 10/26/2004

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Title

Head actuator assembly for a tape drive

Preliminary Class

156

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

A HEAD ACTUATOR ASSEMBLY FOR A TAPE DRIVE

RELATED APPLICATIONS

[01] The present application claimed priority to provisional application 60/444,115, filed on January 30, 2003, the entire contents of which are hereby incorporated by reference.

FIELD OF THE INVENTION

[02] The present invention relates to the field of tape drives, and more particularly, to the head actuator assembly for a tape drive.

BACKGROUND OF THE INVENTION

[03] A tape drive head assembly generally comprises three main components: a magnetic read/write head, a movable carriage supporting the head, and a flexible circuit electrically connected to the head. The flexible circuit includes a fine positioner loop and a coarse positioner loop. A flexible printed circuit provides communication between the main control circuitry of the tape drive and the head positioning apparatus. Generally, a voice coil serves as an actuator for the fine positioner.

[04] Magnetic tape data storage devices, or tape drives, are used for storing large quantities of computer data. As storage capacities of tape drives increase, the overall performance and structural integrity of the drives needs to improve. One of the areas needing improvement is found in the performance of the head positioning system.

[05] Lateral motion at the read/write head needs to be controlled within a few micrometers in order to achieve a LTO (linear tape open) cartridge capacity of 400 GB, for example. Conventional techniques of controlling this lateral motion include a camming arrangement between a pivoting beam structure and the head structure that translates a rotational motion into a linear motion of the head traverse. The fine positioner prime mover is a rotary voice
